Welcome to the journey of beauty

*"Beauty is our mantra.
Though aesthetics can help rejuvenate your skin or
body, it is truly the confidence you find within that
exudes true beauty. Here, at our clinic, our passion is
to help each and every patient flourish confidently from
the inside, out."*

Reneé Management Team

Deep Cleansing & Acne Facial

Consultation

30 minutes – **Free**

At Renée, our skin care experts will provide free consultation during first visit. This is for an accurate and deeper understanding of your skin condition, and tailored treatment plan will be provided.

Deep Cleansing Facial Treatment

30 minutes – **\$70**

Reneé skin care expert would select the most suitable type of deep cleansing product according to your skin analysis report. To cleanse all impurities and make up residue on the skin surface to prep the skin before proceeding to your treatment.

Aqua Microbubble Infusion Deep Cleansing Treatment

This treatment would include a deep skin cleansing procedure to remove makeup residues, followed by a hot facial patch and facial steam to remove blackheads and whiteheads on face. Then microbubble suction to remove impurities, blemishes and blackheads accompanied with a facial mask and LED Light Therapy

Carboxy Treatment

60 minutes – **\$280**

At Reneé, Carboxy therapy had a long successful track record in the medical beauty industry with proven results. It is based on a simple principle - introduction of the small quantities of carbon dioxide into the skin stimulates the body to produce more oxygen. The CO2 in sterilised packet and activation gel are applied on the area. As the result of activation gel's action, the controlled quantities of gas penetrate

in the skin, the maximum effect is reached with stimulating massage with boosters and serums depending on the skin type. The added benefit of CO2 is that also destroys fat cells, eliminates toxins, strengthens the blood cells, and boosts natural skin elasticity. In addition, it also stimulates skin immune activity.

Astro Light Photodynamic Therapy

20 minutes – \$20 | 40 minutes – \$40

Photodynamic Therapy (PDT) is a non-invasive procedure created to increase cell turnover and stimulate collagen production in an effort to treat sun damage, severe acne, rosacea, enlarged sebaceous glands, wrinkles and fine lines. PDT utilises a photosensitising molecule with a light source of specific wavelength to activate the oxygen molecules that are readily available which helps boost skin immunity and natural recovery.

Red Light Therapy

This therapy smooths the appearance of fine lines and calms inflammation. Red light is effectively penetrated into the skin stimulating it to produce more collagen naturally for a smoother and firmer skin. It has the ability to improve all signs of aging and triggers repair responses in your skin which produces new cells and helps them metabolise nutrients more effectively. This will lead to fading dark spots, more even skin tone and an overall brighter, healthier complexion.

Yellow Light Therapy

This therapy reduces skin redness, treats rosacea, reduces the appearance of facial blood vessels, and eliminates UV radiation damage. Yellow light is an ideal therapy for sensitive skin because it calms and soothes the skin for a healthier complexion. It also helps to detoxify the skin, boost lymphatic flow and increase cellular growth.

Green Light Therapy

This therapy helps address uneven skin tone and discoloration. Green light controls skin pigment by targeting cells called melanocytes and slowing the rate they produce melanin in your skin. It also works to break up clusters of melanin that are the root cause of dark spots.

Blue Light Therapy

This therapy reduces acne and blemishes for a clearer complexion. Blue light kills the bacteria deep within the pores that are the leading cause of breakouts. It also works to soothe and calm any post-acne inflammation.

What is Thermage?

Thermage is a non surgical procedure that uplifts sagging skin, corrects fine lines and wrinkles.

Thermage stimulates your body to produce new collagen producing subtle and natural looking results on and off the face.

Thermage®

Address the visible signs of aging in minutes.

The Thermage® system is a non-invasive radio frequency (RF) therapy that can help smooth, tighten and contour skin for an overall younger-looking appearance.

Full face (Forehead, Eye Area, Mouth Area, Cheek)	\$1800
Full face + Neck + double chin	\$1980

PicoSure®: Deep Reach - For Deep Pigment Shattering

With PicoSure®, your customers will appreciate the faster treatment results with shorter treatment sessions. PicoSure® offers up to 15 spot sizes, ranging from 2mm to 15mm, the largest uniform spot size in today's aesthetics industry and almost four times larger than that of the closest competitor.

PicoSure®'s larger spot sizes allow deeper maintenance of penetration into the

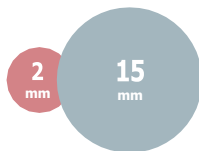

dermis and better dispersal of the pigment or embedded ink particles. Studies have demonstrated that treatment with a large spot size at low fluencies significantly decreases any occurrence of blistering, discoloration or scarring on the skin's surface, since the energy is being spread over a wider area.

The only treatment which can erase a rainbow

4 Wavelengths – For effective shattering of the most popular pigment/ink colours

Since each pigment color absorbs a specific wavelength, PicoSure® offers 3 wavelengths in order to treat the broadest range of pigment/tattoo colours, on the widest range of skin types. Its four wavelengths - 1064nm, 755nm and 532nm - target 9 of the most frequently used tattoo colours ranging from light orange to dark black. With PicoSure® you can erase the rainbow.

PicoSure®

Pigmentation | Melasma | Acne scars

Inner Thigh	\$999 / both thighs

EMSCULPT

Build muscle & Burn fat

EMSCULPT Fat burn Slimming

60 minutes per Applicator

Only one session is required per body part. For instance, tummy needs one Applicator. Thigh needs two Applicators.

Fat cells are removed from body through muscle contractions and treated body part will reduce in size from first week of treatment onwards. Balanced lifestyle and healthy diet with sufficient water intake will speed up the process and reduced body size will maintain.

2 Applicators	\$499 / applicator
4 Applicators	\$399 / applicator
6 Applicators	\$299 / applicator
8 – 10 Applicators	\$249 / applicator

Supreme Facial

Supreme Facial

60 minutes – \$180

Deep Cleansing

Renée skin care expert would thoroughly cleanse all impurities and make up residue on the skin surface to prep the skin before proceeding to the subsequence intensive treatment. This step would improve congestions by removing blackheads, milia and blocked pores.

Facial Steaming

Warm steam softens the surface of the skin to remove impurities, bacteria and dirt from the pores. Steam revives tired skin and supports the absorption of moisture increasing the skin's suppleness.

Aqua Microbubble Infusion

This treatment would include a deep surface cleansing procedure, followed by a hot facial patch on the whole face to kill all micro-bacteria and then hydrating essence would be applied which has an anti-aging effect.

RF with Serum Facial for Hydration

Renée microneedling facial procedure stimulates the penetration of serums into the dermis layer with appropriate massage that is specific to anti-aging, facial lifting and tightening, pre tightening, hydrating and anti-inflammatory.

Hydrating Gel Mask + Light Therapy

This hydrating gel mask helps minimise the signs of ageing by stimulating the skin's natural collagen production and effectively restoring the cells back to its optimum health.

Photodynamic Light Therapy (PDT) is a non-invasive procedure created to increase cell turnover and stimulate collagen production.

Hydrating Serum + Sunblock

This is the final step of locking in all moisture into the skin, preparing the skin for further rejuvenation with after-care applications at home. Sunblock application is essential in avoiding the free radicals exposure and UV rays from damaging the new skin cells.

NanoSoft Microneedling by FILORGA

NanoSoft Microneedling By FILORGA is a unique anti-aging, poly-revitalizing complex that nourishes the epidermis by providing the ingredients that it needs to thrive.

It creates the optimal environment for fibroblasts, which are responsible for the production of collagen, elastin and hyaluronic acid.
